In this rapidly changing world, NFC technology has become an indispensable element in our lives.

By making NFC devices close to your phone, the NFC module will be activated immediately. It enables quick and easy data transfer between devices. With NFC-enabled devices, such as smartphones or smartwatches, users can make payments simply by tapping their devices on a payment terminal. NFC-enabled access cards or key fobs can be used to grant access to restricted areas. NFC also facilitates the sharing of information between devices. NFC technology can be used for public transportation systems.

53.8*53.8mm 4-R4.2

28*28mm 4-R3
